C-O-N-F-I-D-E-N-T-I-A-I. 50X1-HUM -2combine was a nonsynthetic canvas imprinted with accamouflage design; this material was used to fill military orders. (no details) Attachment 2: The Red Rose Textile Combane, during 1949-1956, made, among other textiles, a cream-colored parachute material. One order might call for 200 to 500 meters of fabric; the plant sometimes got one or two orders a month and sometimes only one in two months. According to this twopage report, the combine had no secret shops or secret activity. Attachment 3: This six-page report on the Serp i Molot Metallurgical Plant names plants with which it had commercial relations and describes the types of steels exchanged. The plant also worked with titanium. The secret division (sekretnyy otdel) was the only restricted part of the plant; reportedly, no military work was done in any part, Attachment 4: Textile Mill No. 14 in Kuntsevo, during 1943-1956, produced fabrics for the military, for government orders, and for export. This twopage report briefly describes six materials, some of which were used for military uniforms. An additional page, thermofaxed, has sketches of two factory markings; these markings, seals, are described.

- 1. INFORMATION ON THE TEXTILE MANUFACTURING COMBINE I/N DZERZHINSKIY AND ITS MILITARY PRODUCTION 2. BRIEF COMMENTS ON MILITARY ACTIVITY IN THE SENEZH AREA
- The Textile Manufacturing Combine i/n Dzerzhinskiy (Kombinat Trekhgornogo Manufactura imeni Dzerzhinskogo) was located on Rochdelskaya ulitsa No. 13, between the afore-named street and Kransnoprenenskaya naberezhnaya, in Krasnopresenskiy rayon, Moscow. the employees usually called it the "Trekhgorka". The combine, one of the largest of its kind in the USSR, employed about 6,000 workers. It comprised three called them factories), namely, a weaving, a spinning and a printing mill; the last had bleaching, trimming, 50X1-HUM dyeing, and printing shops, plus sorting, packing and transportation sections, and employed about 400 workers. There was, moreover, a design office employing some 25 to 30 designers and
